Podešavanje PPPoE konekcije

za korištenje WADSL servisa na Windows 7 operativnom sistemu

Pokrenite **START --> Control Panel**. U novootvorenom prozoru sa desne strane odaberite **View by: Small icons**, a zatim odaberite stavku **Network and Sharing Center**.

Izaberite prvu opciju **Connect to the Internet**, i kliknite **Next**.

U sljedećem prozoru će vas možda upozoriti da već imate internet konekciju. Ignorišite ovo upozorenje, i nastavite sa podešavanjem i izaberite **Set up a new connections anyway**. Može se desiti da već imate kreiranu neku konekciju od ranije i da će vas windows pitati da li želite da koristite postojeću. Odaberite opciju **No**, **create a new connection** i kliknte **NEXT**.

Choose a connection option	
Connect to the Internet Set up a wireless, broadband, or dial-up connection to the Inter	met
Set up a new network Configure a new router or access point.	
Connect to a workplace Set up a dial-up or VPN connection to your workplace.	
Set up a dial-up connection Connect to the Internet using a dial-up connection.	

Nakon što ste nastavili sa podešavanjem u sljedećem prozoru odaberite Broadband (PPPoE).

łow do	you want to connect?
2	azoadband (PPPoE) Connect using DSL or cable that requires a user name and password.
She	w connection options that this computer is not set up to use

Nakon toga, u sljedećem prozoru unesite pristupne podatke sa ugovora za WADSL servis. Obratite pažnju na korisničko ime (username) da ne otkucate sa @blic.net nastavkom, i da je lozinka (password) sastavljena isključivo od malih slova latinice i brojeva.

1. U prvo polje User

name unosite vaše **korisnicko ime** koje ste dobili prilikom otvaranja ugovora.

 U drugo polje **Password** unosite **lozinku** koju ste takođe dobili prilikom otvaranja ugovora.

Type the informatic	n from your Internet service prov	rider (ISP)
User name:	blic	
Password		
	Show characters	
	Remember this password	
Connection game:	WADSI.	
R Tallow other neon	le to use this connection	
This option allow	s anyone with access to this computer to us	e this connection.
This option allow	s anyone with access to this computer to us	e this connection.

3. U treće polje Connection name unosite naziv vaše konekcije WADSL. Poželjno je da se uključi kvačica za Remember this password (da biste sačuvali lozinku za naredno pokretanje konekcije). Nakon unošenja podataka kliknite na Connect, nakon čega će računar pokušati ostvariti probnu konekciju. Kako konekcija još uvijek nije u potpunosti podešena, kliknite na dugme Skip, a zatim na dugme Close.

Nakon što ste kreirali konekciju u prozoru **Network and Sharing Center**-a sa lijeve strane izaberite opciju Change adapter settings.

U polju koje se otvori bi se trebala nalaziti ikonica **WADSL**. Kliknite desnim

klikom na nju i odaberite opciju Properties.

Control Panel Home Change adapter settings Change advanced sharing settings MLADEN-P. (This comp View your active m View your active m on

U prvoj kartici, **"General"** u polje **Service name** upišite BLICNET (velikim slovima, bez tačke). Zatim odaberite karticu **"Networking"** i isključite opciju **Internet Protocol Version 6**.

General Options Security Networking Sharing	General Options Security Networking Sharing
Service name:	This connection uses the following terms:
BUCNET	Henry Protocol Version 6 (TCP//PvG)
	Internet Protocol Version 4 (TCP/IPv4) Bis and Printer Sharing for Microsoft Networks TOert for Microsoft Networks
	Description
	TCP/IP version 6. The latest version of the internet protocol that provides communication across diverse interconnected networks.
to a state of the state of the	
information.	

Nakon toga, kliknite na OK, i time ste završili podešavanje konekcije.

Ukoliko želite ikonu za konekciju na vašem Desktop-u dovoljan je desni klik na ikonu **WADSL** u meniju **Change adapter settings** i odaberete opciju **Create Shortcut**.

Konekciju možete da pokrenete lijevim klikom miša na Active Networks (aktivne
mreze i konekcije) računar u donjem desnom uglu na monitoru. Odaberete vašu
konekciju WADSL i kliknete na dugme Connect , nakon čega će vam se
pokrenuti prozor za konekciju.
Na isti način vrsite i diskonektovanje.

Ugodno surfanje!
